

May Newsletter

It's nice to feel spring all over around us. We are happy that we can spend some quality time outside to take care of our Garden.

Last month, especially during the Spring break we've had a lot of discussions about the Nature and Plants. We've observed bugs and sprouting trees and planted sunflower seeds. Every day children take turns to check and water the seeds and they are very excited to see some sprouts already. One of the group projects this month is to transfer the sprouts into our garden outside so they will have more space to grow. This month we are going to plant more seeds and our topic is "**vegetables**". Children will talk about healthy food and learn how to grow vegetables.
